

Air Force releases revised Selective Reenlistment Bonus list

The Air Force has completed its latest review of the Selective Reenlistment Bonus program, increasing eligibles by 11 skills.

These reviews are conducted semi-annually, normally in June and December, and involve a comprehensive review of all enlisted specialties.

The criteria used for determining which enlisted skills receive an SRB includes current and projected manning levels, recent reenlistment trends, training factors, career field

force structure changes, and inputs from individual career field managers. SRBs are authorized in one-half increments (or multiples) from one-half to 10, and in three reenlistment zones for personnel with between 21 months and 14 years of service.

The revised AFSC listing of SRB skills includes 24 Zone A (21 months to 6 years of service), 15 Zone B (6 to 10 years of service) and 3 Zone C (10-14 years of service) multiplier increases and 16 Zone A, 12 Zone B and

5 Zone C additions, respectively, from the previous SRB list published in June 1999.

A total of 146 skills are now authorized an SRB in Zones A, B, and/or C. Nine skills with existing Zone A and/or Zone B SRBs have multiplier reductions.

The current SRB skills list below were effective Jan. 13 for additions and multiple increases. As indicated, SRB multiple decreases/deletions are effective Feb. 19.
